Monday to midnight Friday: **877-870-BBOX** FREE technical support, 24 hours a day, 7 days a week: Call **724-746-5500** or fax **724-746-0746** Mail order: **Black Box Corporation**, 1000 Park Drive, Lawrence, PA 15055-1018 Web site: www.blackbox.com • E-mail: info@blackbox.com

# FEDERAL COMMUNICATIONS COMMISSION AND CANADIAN DEPARTMENT OF COMMUNICATIONS RADIO FREQUENCY INTERFERENCE STATEMENT

This equipment generates, uses and can radiate radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio communication. It has been tested and found to comply with the limits for a Class A computing device in accordance with the specifications in Subpart B of Part 15 of FCC rules, which are designed to provide reasonable protection against such interference when the equipment is operated in a commercial environment. Operation of this equipment in a residential area is likely to cause interference, in which case the user at his own expense will be required to take whatever measures may be necessary to correct the interference.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This digital apparatus does not exceed the Class A limits for radio noise emission from digital apparatus set out in the Radio Interference Regulation of the Canadian Department of Communications.

Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dans le Règlement sur le brouillage radioélectrique publié par le ministère des Communications du Canada.

#### Normas Oficiales Mexicanas (NOM) INSTRUCCIONES DE SEGURIDAD

- Todas las instrucciones de seguridad y operación deberán ser leídas antes de que el aparato eléctrico sea operado.
- 2. Las instrucciones de seguridad y operación deberán ser guardadas para referencia futura.
- Todas las advertencias en el aparato eléctrico y en sus instrucciones de operación deben ser respetadas.
- 4. Todas las instrucciones de operación y uso deben ser seguidas.
- 5. El aparato eléctrico no deberá ser usado cerca del agua—por ejemplo, cerca de la tina de baño, lavabo, sótano mojado o cerca de una alberca, etc.
- 6. El aparato eléctrico debe ser usado únicamente con carritos o pedestales que sean recomendados por el fabricante.
- 7. El aparato eléctrico debe ser montado a la pared o al techo sólo como sea recomendado por el fabricante.
- 8. Servicio—El usuario no debe intentar dar servicio al equipo eléctrico más allá a lo descrito en las instrucciones de operación. Todo otro servicio deberá ser referido a personal de servicio calificado.
- 9. El aparato eléctrico debe ser situado de tal manera que su posición no interfiera su uso. La colocación del aparato eléctrico sobre una cama, sofá, alfombra o superficie similar puede bloquea la ventilación, no se debe colocar en libreros o gabinetes que impidan el flujo de aire por los orificios de ventilación.
- 10. El equipo eléctrico deber ser situado fuera del alcance de fuentes de calor como radiadores, registros de calor, estufas u otros aparatos (incluyendo amplificadores) que producen calor.
- 11. El aparato eléctrico deberá ser connectado a una fuente de poder sólo del tipo descrito en el instructivo de operación, o como se indique en el aparato.

- 12. Precaución debe ser tomada de tal manera que la tierra fisica y la polarización del equipo no sea eliminada.
- 13. Los cables de la fuente de poder deben ser guiados de tal manera que no sean pisados ni pellizcados por objetos colocados sobre o contra ellos, poniendo particular atención a los contactos y receptáculos donde salen del aparato.
- El equipo eléctrico debe ser limpiado únicamente de acuerdo a las recomendaciones del fabricante.
- 15. En caso de existir, una antena externa deberá ser localizada lejos de las lineas de energia.
- El cable de corriente deberá ser desconectado del cuando el equipo no sea usado por un largo periodo de tiempo.
- 17. Cuidado debe ser tomado de tal manera que objectos liquidos no sean derramados sobre la cubierta u orificios de ventilación.
- 18. Servicio por personal calificado deberá ser provisto cuando:
  - A: El cable de poder o el contacto ha sido dañado; u
  - B: Objectos han caído o líquido ha sido derramado dentro del aparato; o
  - C: El aparato ha sido expuesto a la lluvia; o
  - D: El aparato parece no operar normalmente o muestra un cambio en su desempeño; o
  - E: El aparato ha sido tirado o su cubierta ha sido dañada.

# **About This Manual**

This manual describes the Black Box Express Ethernet Switch in these basic sections:

- Product Features
- Installation

#### **Product Features**

This section examines the key features, the physical features, and the product specifications of each model.

#### Installation

This section leads with a Quick Tip, and continues with a detailed description of Connecting to Power and Connecting to Your Network with the two types of cable: copper-based and fiber-optic. The section concludes with instructions on using the Uplink Function.

This manual services the following Express Ethernet Switches:

SIZE	PART NUMBER	PORT COUNT
COMPACT	LB9007A-ST-R3	7 port TX, 1 port FX (ST)

#### **Table of Contents** About This Manual 4 Front Panel 8 Specifications 9 Applicable Standards 9

# **Packing List**

Please inspect the contents and report any apparent damage or missing items immediately to our authorized reseller.

- The switch
- User's manual
- One AC power cord

## **FCC Statement**

The FCC (Federal Communications Commission) restricts the amount of radio frequency emission and radiation coming from computer equipment. The Ethernet switch stated in this manual has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user is required to correct the interference at his/her own expense. Any changes or modifications not expressly approved by the manufacture would void the user's authority to operate the equipment.

#### Introduction

The switch is an 8-port Fast Ethernet switch, integrating 10/100BaseTX (100BaseFX) networks in a cost-effective compact size package. The TX ports can auto sense speed and half/full duplex modes and auto-MDIX.

#### **Product Features**

- 7-port for 10/100BaseTX and 1-port for 100BaseFX.
- The TX ports auto negotiate for 10/100Mbps speed, auto detect full/half duplex mode, and auto-MDIX.
- ST connectors for FX ports.
- Broadcast storming filter function.
- True non-blocking architecture.
- Full wire-speed forwarding rate.
- Store-and-forward mechanism.
- Back pressure and IEEE802.3x compliant flow control.
- Supports 2K MAC addresses.
- Supports 1M bits buffer memory.
- Front panel power and port status LEDs.
- · Compact size.

#### **Front Panel**

The front panel of the switch has five or eight ports and an array of LED indicators to provide you with instant feedback on the status of the switch.

#### **LEDs**

The array of LED indicators on the front panel conveys status and configuration information to help you monitor and troubleshoot the switch.

Figure 1: Front & rear panels

- **Power** This LED comes on when the switch is connected to the power.
- **Port Status** Each port has a LED, indicating the port status.
- Power Adapter Connect the supplied AC power cord to the receptacle on the back of the switch, then plug the cord into a standard AC outlet with a voltage range from 100 to 240 VAC.

Table 1: Port Status

LED	State	Indication	
LNK/	Steady	The port has established a valid network connection. LNK stands for LINK.	
ACT	Flashing	The port is transmitting or receiving data. ACT stands for ACTIVITY.	

## Installation

#### **Selecting a Site for the Switch**

As with any electronic device, you should place the switch where it will not be subject to extreme temperatures, humidity, or electromagnetic interference. Specifically, the site you select should meet the following requirements:

- The ambient temperature should be between 32 and 104 degrees Fahrenheit (0 to 40 degrees Celsius).
- The relative humidity should be less than 90 percent, non-condensing.
- Surrounding electrical devices should not exceed the electromagnetic field (RFC) standards for IEC 801-3, Level 2 (3V/M) field strength.
- Make sure that the switch receives adequate ventilation. Do not block the ventilation holes on the side of the switch or the fan exhaust port on the rear of the switch.
- The power outlet should be within 1.8meter (6 feet) of the switch.

#### **Connecting to Your Network**

Connect network cables from computers or network segments to the TX (FX) ports on the front of the unit.

#### Table 2: Cabling Information

Speed	Connector	Port Speed Half/Full Duplex	Cable
100BaseTX	RJ-45	100/200 Mbps	100 m, Category 5 STP/UTP
10BaseT	RJ-45	10/20 Mbps	100 m, Category 3, 4, or 5 STP/UTP
100BaseFX Multi-mode	SC, ST, MT- RJ, VF-45, or LC	100/200 Mbps	Up to 2km, 50 or 62.5/125µm Multi-mode fiber cable
100BaseFX Single-mode	SC	100/200 Mbps	Up to 75km, 9 or 10/125µm Single-mode fiber cable
